

NUS High School Oratorical Challenge 2017

On 28 July 2017, NUS High School organised its inaugural Oratorical Challenge that aimed to develop versatile communicators in primary school students to be adept and confident in speaking about personal, social and scientific issues in public.

This Challenge offers a unique experience where Primary 4 to Primary 6 students compete in delivering both fictional and information/scientific speeches. Hari Preetha from 6 Hope did the school proud by clinching the second runner-up position. She had shown the virtues of confidence, determination and assertiveness throughout the competition. Well done, Hari!
