

2018 Wildlife Buddies Programme

The Primary Six pupils went on a learning journey to River Safari with their Primary 1 buddies on 22 March and 2 April 2018. During the trail, they were given an opportunity to assume the roles of leaders and foster a deeper understanding of environmental conservation. With the acquired knowledge, the Primary Six pupils conveyed conservation messages about animals to their Primary One buddies and guided them to complete the Young Zoologist Badge activities. After the trail, the Primary Six pupils attended a lesson on adaptation of water animals conducted by educators from the River Safari. They had an eye-opening experience when they explored and observed the structural adaptations of the specimens displayed.

Can you spot the animals?
