

Outreach @ Ricoh Pte Ltd

12 July 2018

In our efforts to spread environment conservation messages to the community, our Environmental Science Club initiated an outreach programme to Ricoh Pte Ltd to share about recycling and upcycling of daily objects. Here, the participants turned egg cartons into roses and used them to decorate their homes and office!

The participants collected egg cartons and learnt how to turn them into beautiful roses.

Our young presenters also shared how the participants could use these roses to decorate items in their homes.
