If you have forgotten your password, you can reset it by having a password reset email sent to your email address, or by answering a series of security questions.

If your teacher is available to reset the password for you, you will be given a one-time password (OTP) to log in, after which you will be prompted to key in a new password.

If you need immediate access to the SLS in class, your teacher can provide you with a 2-hour temporary password (2HTP). The 2HTP only allows you to access the Assignments and MOE Library. It does not allow you to reset your password or change other details in your Profile.

Reset Password with a Password Reset Link

Note: You can only do this if you have previously set a verified password reset email address ([set-password-reset-email-address.html](#)).

Get Temporary Access to SLS

If you need to log in to the SLS during class and have forgotten your password, your teacher can generate a one-time password (OTP) to give you temporary access.

- The OTP will only be valid for 2 hours.
- If you log in with an OTP, you will not be able to access **My Profile** and cannot change your password, answers to the security questions, or email address.

This is only a temporary solution. If you have forgotten your password, you should try to reset it following the steps above.
