

IMDA Lab on Wheels

To nurture the joy of learning in our pupils, we invited IMDA Lab on Wheels to our school on 25th & 26th September 2018. IMDA Lab on Wheels is designed to be experiential and engaging, with activities aimed to spark students' interest in technology.

This year, the P4 pupils had a chance to use Airblock, a modular transformable drone. During their lessons, the pupils were taught on how to transform the Airblock into a portable fan, car, and even hovercraft. The pupils displayed the virtues of enthusiasm and self-discipline, and they had an enjoyable time learning with Airblock.
